Subject Index: Volume 34, 2001

Note: (a)= abstract; (letter)= letter to the editor

Acidosis
during cocaine-induced seizures, 345
Action potential
acute inferior wall myocardial infarction with hyperkalemia, 53
canine pulmonary veins, 325(a)
duration, cardiac memory in Purkinje fibers and, 31
Acute myocardial injury
from coronary spasm after MFS ingestion, 335
Algorithm
for diagnosis of limb lead misplacement, 161
Ambulatory electrocardiography
QT interval rate-dependence in congestive heart failure, 35
Amiodarone
for short-coupled variant torsades de pointes, 271
Angina pectoris
unstable, ST-segment monitoring, 103
Anorexia nervosa
12-lead electrocardiogram, 233
Antiarrhythmic drugs
class Ic for atrial flutter, syncope and, 65
class III. *See* Nifekalant
for short-coupled variant torsades de pointes, 271
Antifibrillatory effects
of carvedilol, 25
Arrhythmias. *See also* specific arrhythmias
in infants/children, molecular biology and cellular mechanisms, 320(a)
repeated pattern ventricular, variability in, 225
Atrial conduction delay
assessment, signal-averaged P-wave ECGs for, 189
Atrial ectopic activation
selective interarterial activation patterns during, 1
Atrial fibrillation
with bradycardia-dependent right bundle branch block, 81
prevention by multisite atrial pacing, 49
time course, signal-averaged P-wave ECG and, 189
Atrial flutter
class Ic antiarrhythmic therapy, syncope during, 65
Atrial pacing, multisite
for atrial fibrillation prevention, 49
Atrioventricular block
affected by autonomic nervous system, 339
with apparent AV junctional escape complexes, 351
with repetitive supernormal conduction in right bundle branch, 179
Atrioventricular conduction
symptomatic AV nodal reentrant tachycardia and Wolff-Parkinson-White syndrome, 295
Atrioventricular intervals
diagnostic algorithm for 1-to-1 tachycardia discrimination, 331(a)
Atrioventricular nodal pathways, dual
with AV block and apparent AV junctional escape complexes, 351
with nonreentrant supraventricular tachycardia, 59
Atrioventricular nodal reentrant tachycardia
symptomatic, gender and AV conduction properties, 295
Atrioventricular node
cardiac memory, PR interval dynamics during exercise/recovery and, 31
Atrioventricular simultaneous pacing
of dual AV nodal pathways in nonreentrant supraventricular tachycardia, 59
Atropine
effect on familial atrioventricular block, 339
Automation
evaluation of precordial ECG BELT, 155
Autonomic nervous system
familial atrioventricular block and, 339
heart rate decline after exercise in hypertrophic cardiomyopathy, 141
ventricular repolarization in congestive heart failure and, 35
Autonomic neuropathy
power spectral analysis of heart rate variability, 243

Baseline instability
evaluation of ECG BELT, 155
Beta-adrenergic stimulation
Brugada syndrome, 319(a)
Beta-blockers
antifibrillatory effects, placebo-controlled evaluation of, 25
with class Ic antiarrhythmics, proarrhythmic effect and, 65
Biventricular pacing
for advanced heart failure with left bundle branch block, 330(a)

Body surface mapping
vulnerability to ventricular tachyarrhythmias and, 127
Bradycardia-dependent block
with atrial fibrillation, 81
Brugada syndrome
after cocaine injection, 345
diagnosis, 319(a)
electrocardiograhic diagnosis, medico-legal implications, 321(a)
Bundle branch block. *See* **Left bundle branch block; Right bundle branch block**
Bundle-His block
affected by autonomic nervous system, 339

Cardiac innervation
percutaneous cervical cordotomy effect on, 309
Cardiac memory
AV node, PR interval dynamics during exercise/recovery and, 31
Cardiovascular system
power spectral analysis of heart rate variability in diabetic autonomic neuropathy, 243
CARTO system
for mapping supraventricular tachycardia, 334(a)
Carvedilol
antifibrillatory effects, 25
Cervical cordotomy, percutaneous
depression of sympathetic indexes derived from heart rate variability, 309
Chagas disease
heart rate variability in, 329(a)
Clinical decision making
using cumulative historical and physical findings with ECG, 215
Clinical trials
standards for electrocardiographic core laboratory, 41
Cocaine
aborted sudden death with electrocardiographic abnormalities, 345
Conduction
concealed, in bradycardia-dependent block with atrial fibrillation, 81
supernormal, in right bundle branch with high degree bilateral bundle branch block, 179
Congestive heart failure
autonomic influences on ventricular repolarization, 35
Coronary artery disease
electrocardiographic classification systems, 355(letter)
Coronary sinus
selective interarterial activation patterns during atrial ectopic activation, 1
Coronary vasospasm
from magnesium fluoro-silicate poisoning, 335

Coupling interval
short, in torsades de pointes, 271

Diabetes mellitus
autonomic neuropathy, power spectral analysis of heart rate variability, 243
Diagnostic errors
limb lead misplacement, diagnosis of, 161
Dialyzable current of injury
in acute inferior wall myocardial infarction with hyperkalemia, 53
Dilated cardiomyopathy
assessment of vulnerability to ventricular tachyarrhythmias, 127
Double ventricular response
in nonreentrant supraventricular tachycardia, 59

Echocardiogram
left ventricular hypertrophy in essential hypertension, 327(a)
Electrocardiogram. *See also specific electrocardiographic components*
Brugada syndrome, 319(a)
classification systems for ischemia and CAD, 355(letter)
diagnosis of myocardial infarction-induced ventricular aneurysm with LBBB, 147
ethnic differences in, 303
giant R-waves in acute inferior myocardial infarction, 173
12-lead, in anorexia nervosa, 233
left middle fascicular block, 323(a)
left ventricular hypertrophy in essential hypertension, 327(a)
left ventricular hypertrophy risk prediction, 91
limb lead misplacement, diagnosis of, 161
multiple-lead epicardial, in myocardial infarction, 15
new risk stratification indices, 332(a)
prognostic value, with cumulative historical and physical findings, 215
Q wave necrosis, in myocardial infarction, 328(a)
septal Q wave absence, 207
unusual responses in exercise stress testing, 265
Electrocardiogram BELT
evaluation of satisfaction with accuracy of recording, 155
Electrocardiographic core laboratory
functional standards for, 41
Electrodes
limb lead misplacement, diagnosis of, 161
Electrophysiology
left middle fascicular block, 323(a)
short-coupled variant torsades de pointes, 271
Estrogen replacement therapy
effect on ventricular repolarization, 277
Ethnicity
electrocardiographic intervals/axes and, 303

Exercise
heart rate decline in hypertrophic cardiomyopathy, 141
PR interval dynamics, cardiac memory at AV node and, 31
syncope of atrial flutter patients on class Ic antiiarrhythmic drugs, 65
Exercise stress testing
familial atrioventricular block, 339
unusual ECG responses, 265

Flecainide
for atrial flutter, syncope and, 65
Focal conduction block
giant R-waves in acute inferior myocardial infarction, 173

Gender
symptomatic AV nodal reentrant tachycardia and Wolff-Parkinson-White syndrome, 295
Giant T waves
in exercise stress testing, 265

Heart failure
autonomic influences on ventricular repolarization, 35
with left bundle branch block, biventricular pacing for, 330(a)
QRS duration reflects ventricular dilatation in, 326(a)
Heart rate decline
exercise in hypertrophic cardiomyopathy and, 141
Heart rate variability
in Chagas disease, 329(a)
and QT dispersion in mitral valve prolapse, 89(letter)
sympathetic indexes, cervical cordotomy and, 309
Hybrid reperfusion strategies
myocardial infarction outcome improvement, 322(a)
Hyperkalemia
acute inferior wall myocardial infarction and, 53
in acute inferior wall myocardial infarction with hyperkalemia, 53
Hypertension
with left ventricular hypertrophy, vectorcardiographic detection of, 327(a)
Hypertrophic cardiomyopathy
exercise, heart rate decline after, 141
Hypocalcemia
from magnesium fluoro-silicate poisoning, 335
Hypomagnesemia
from magnesium fluoro-silicate poisoning, 335

Idiopathic ventricular tachycardia
lack of noninvasive markers of ventricular repolarization inhomogeneity, 289
Implantable cardioverter defibrillators
diagnostic algorithm for tachycardias, 331(a)
Inferior myocardial infarction
giant R-waves in, 173
Initial QRS forces
septal Q wave absence and, 207
Ion channel mutations
Brugada syndrome, 319(a)
sudden cardiac death in infants and children, 320(a)
Irregular parasystole
ventricular parasystolic couplets, 251
Ischemia
mental stress-induced, with myocardial bridge, 73

JT dispersion
in monomorphic or polymorphic ventricular tachycardia/ventricular fibrillation, 119
Juncational escape complexes
with advanced AV block, 351
Junctional rhythm
after cocaine injection, 345

Left anterior hemiblock
in exercise stress testing, 265
Left axis deviation
in perimembranous ventricular septal defect, 197
Left bundle branch block
diagnosis of myocardial infarction-induced ventricular aneurysm in, 147
with heart failure, biventricular pacing for, 330(a)
ST-segment elevation in leads V_1-V_3, 87(letter)
Left middle fascicular block
electrical, endocardial mapping of, 323(a)
Left ventricular hypertrophy
in essential hypertension, vectorcardiographic detection of, 327(a)
Left ventricular-to-right atrial shunt
perimembranous ventricular septal defect and, 197
LF/HF ratio
depression after cervical cordotomy, 309

Magnesium fluoro-silicate poisoning
acute myocardial injury from coronary spasm, 334(a)
Mexiletine
for short-coupled variant torsades de pointes, 271
Misdiagnosis
giant R-waves in acute inferior myocardial infarction, 173
Mitral valve prolapse
heart rate variability and QT dispersion in, 89(letter)
Model
repeated pattern ventricular arrhythmia, 225
Myocardial bridge
mental stress-induced myocardial ischemia and, 73
Myocardial infarction
acute inferior wall, in hyperkalemia, 53
assessment of vulnerability to ventricular tachyarrhythmias, 127
dynamic changes in QT interval and QT dispersion, 109
necrosis Q wave in, 328(a)
non-Q-wave, ST-segment monitoring of, 103

outcome improvement, hybrid reperfusion strategies and, 322(a)
Q-wave, classification of, 355(letter)
spectral analysis of multiple-lead epicardial electrocardiograms in, 15
transient, mimicked by ST-segment changes caused by body position, 261
ventricular aneurysm with LBBB, diagnosis of, 147
Myocardial ischemia
mental stress-induced with myocardial bridge, 73
PTCA, ventricular gradient variability during, 135
Myocardial sleeve regions
canine pulmonary veins, absence of arrhythomogenic activities in, 325(a)

Nifekalant
reverse use-dependent QT prolongation, 77
for short-coupled variant torsades de pointes, 271
Noninvasive markers
lack of, for ventricular repolarization inhomogeneity, 289

Percutaneous transluminal coronary angioplasty
alternans of ventricular gradient during, 135
Peripheral embolism
right bundle branch block as marker for, 185
Phenylephrine
effect on familial atrioventricular block, 339
Pilsicainide
for atrial flutter, syncope and, 65
Polymorphic ventricular tachycardia/ventricular fibrillation
QT and JT dispersion in, 119
Postmenopausal women
ventricular repolarization, effect of estrogen replacement therapy on, 277
Potassium channel blockage
by nifekalant in recurrent ventricular tachycardia with old myocardial infarction, 77
Power spectral analysis
of heart rate variability in diabetic autonomic neuropathy, 243
Precordial electrodes
ECG belt, evaluation of satisfaction with accuracy of recording, 155
PR interval
ethnic differences in, 303
during exercise and recovery, cardiac memory at AV node and, 31
Proarrhythmia
of class Ic antiarrhythmic drugs, 65
Prognosis
long-term, ST-segment monitoring of unstable coronary syndromes, 103
Pulmonary artery obstruction
right bundle branch block and, 185
Pulmonary trunk embolism
right bundle branch block and, 185
Pulmonary veins
canine, no arrhythmogenic activities of cardiac muscle in, 325(a)
P wave
signal-averaged, differentiation of persistent and paroxysmal atrial fibrillation, 189
sinus, for diagnosis of limb lead misplacement, 161
P wave axis
ethnic differences in, 303

QRS axis
ethnic differences in, 303
morphologic factors, in perimembranous ventricular septal defect, 197
in perimembranous ventricular septal defect, 205
QRS duration
ethnic differences in, 303
ventricular dilatation in experimental heart failure, 326(a)
QTc duration
in anorexia nervosa, 233
QT dispersion
dynamic changes in myocardial infarction, 109
and heart rate variability in mitral valve prolapse, 89(letter)
in idiopathic ventricular tachyarrhythmias, 289
in monomorphic or polymorphic ventricular tachycardia/ventricular fibrillation, 119
seasonal variability of, 285
QT interval
in acute inferior wall myocardial infarction in hyperkalemia, 53
dynamic changes in myocardial infarction, 109
ethnic differences in, 303
prolongation during nifekalant infusion, 77
in short-coupled variant of torsades de pointes, 271
variability, effect of estrogen replacement therapy on, 277
Q wave
necrosis, in myocardial infarction, 328(a)
septal, absence on normal electrocardiogram, 207

Radiofrequency catheter ablation
for nonreentrant supraventricular tachycardia with dual ventricular response, 59
Recovery time dispersion
measurement by body surface mapping, 127
Reentry
in irregular parasystole, 251
repeated pattern ventricular arrhythmia, 225
Reperfusion
after fibrinolysis, hybrid reperfusion strategies for, 322(a)
Repolarization
in non-Q-wave and Q-wave myocardial infarction, 109
Reproducibility
of QT dispersion, seasonal variability and, 285

Right axis deviation
with pulmonary embolism, 185
Right bundle branch block
bradycardia-dependent with atrial fibrillation, 81
in exercise stress testing, 265
high degree bilateral, repetitive supernormal conduction in, 179
with pulmonary embolism as marker for pulmonary trunk obstruction, 185
Right ventricular overload
with pulmonary embolism as marker for pulmonary trunk obstruction, 185
R-waves
giant, in acute inferior myocardial infarction, 173

SCN5A mutations
Brugada syndrome, 319(a)
sudden cardiac death in infants and children, 320(a)
Seasonal variability
of QT dispersion in healthy subjects, 285
Second-degree entrance block
in irregular parasystole, 251
Seizures
cocaine-induced, 345
Septum
selective interarterial activation patterns during atrial ectopic activation, 1
Signal-averaged electrocardiogram
in myocardial infarction, 15
P wave, differentiation of persistent and paroxysmal atrial fibrillation, 189
Simulation
repeated pattern ventricular arrhythmia, 225
Sinus bradycardia
in anorexia nervosa, 233
Sinus P wave
for diagnosis of limb lead misplacement, 161
Spectral analysis
of epicardial multiple-lead epicardial electrocardiogram in myocardial infarction, 15
ST-segment analysis
changes caused by body position mimicking transient myocardial ischemia, 261
continous monitoring, long-term risk in unstable coronary syndromes, 103
mathematical analytic tool for, 324(a)
ST-segment elevation
in acute inferior wall myocardial infarction in hyperkalemia, 53
after fibrinolysis, hybrid reperfusion strategies for, 322(a)
Brugada syndrome, 319(a)
during exercise stress testing, 265
in leads V_1-V_3 in left bundle branch block, 87(letter)
in magnesium fluoro-silicate poisoning, 335
medico-legal implications in Brugada syndrome, 321(a)
Sudden cardiac death
aborted, after cocaine injection, 345
Brugada syndrome, 319(a)
in infants and young children, 320(a)
medico-legal implications, 321(a)
new electrocardiogram risk stratification indices, 332(a)
Sudden infant death syndrome
cardiac arrhythmias and, 320(a)
Supraventricular tachycardia
mapping, tridimensional CARTO system for, 334(a)
nonreentrant, double ventricular response in, 59
Surface potential mapping
of ventricular repolarization, 333(a)
Survival analysis
using cumulative historical and physical findings with ECG, 215
Syncope
Brugada syndrome, 319(a)
during class Ic antiarrhythmic treatment for atrial flutter, 65

Tachycardia
short-coupled variant torsades de pointes, 271
supraventricular nonreentrant, double ventricular response in, 59
symptomatic AV nodal reentrant, gender and AV conduction properties in, 295
ventricular. *See* **Ventricular tachycardia**
Torsade de pointes
short-coupled variant, electrophysiological characteristics, 271
TRIM trial
follow-up, ST-segment monitoring of unstable coronary syndromes, 103
T-wave alternans
lack of noninvasive markers for, 289
for risk stratification, 332(a)
T wave axis
ethnic differences in, 303

Use dependence, reverse
QT prolongation, nifekalant and, 77

Ventricular activation
septal Q wave absence and, 207
Ventricular aneurysm
myocardial infarction-induced, diagnosis with LBBB, 147
Ventricular arrhythmia
repeated pattern, variability in, 225
Ventricular asystole
after cocaine injection, 345
Ventricular dilatation
in experimental heart failure, QRS duration and, 326(a)
Ventricular fibrillation threshold
increase, carvedilol and, 15
Ventricular gradient variability
during percutaneous translumnal coronary angioplasty, 135

Ventricular parasystolic couplets
in irregular parasystole, 251
Ventricular refractoriness
short-coupled variant torsades de pointes, 271
Ventricular repolarization
analysis by surface potential mapping, 333(a)
autonomic influences in congestive heart failure, 35
effect of estrogen replacement therapy on, 277
Ventricular septal aneurysm
morphological factors on QRS axis, 197
Ventricular septal defect
perimembranous, QRS axis in, 197
Ventricular tachycardia
idiopathic, lack of noninvasive markers of ventricular repolarization inhomogeneity, 289
monomorphic, QT and JT dispersion in, 119
polymorphic ventricular with ventricular fibrillation, QT and JT dispersion in, 119
recurrent, reverse use-dependent QT prolongation during nifekalant infusion, 77
vulnerability assessment, body surface mapping for, 127
Ventriculoatrial intervals
diagnostic algorithm for 1-to-1 tachycardia discrimination, 331(a)
Verapamil
for short-coupled variant torsades de pointes, 271

WBN/Kob rats
power spectral analysis of heart rate variability in diabetic autonomic neuropathy, 243
Wolff-Parkinson-White syndrome
gender and atrioventricular conduction properties, 295
